

1. **Unsightly Properties:** We are still working on the problem properties; while slow there is some progress is seen. We sent 40 notices for tree trimming in preparation for the fall.
2. **Vantage:** There is NO warranty on the roof. We were advised they would be unable to repair this year, we are in the process of getting quotes from other contractors to have this repaired before winter.
3. **HVAC Unit:** Set to arrive in the 3rd week of September, ATCO is beginning their side of the project and the majority of the wiring at the hall is in place and ready for the unit.
4. **Lagoon Survey:** We are starting a new chemical/enzyme treatment regime that will penetrate the sludge better than our current regimen at the same cost. Hopefully this will mitigate the need to mechanically de-sludge the lagoons for a few years.
5. **September 19:** Justin Trudeau announced today that Canada is maintaining a historic tradition of making the funeral of a monarch a national holiday (September 19th).
