

1. **Wireless water meters:** 502 ordered have arrived, so we will be starting to install with a plan to have all installed before the end of the year.
2. **Village of Myrnam Regional Governance Application:** rejected by the Minister of Municipal Affairs because they want the Town, County & Village to apply together for one regional study.
3. **Water Reservoir Inspection:** \$2500 cost was covered through the draw won at the water/wastewater conference that Bob attended. Everything is good!
4. **Lagoon Survey:** cost will be \$2500 to look at our reservoir to get a quote of what needs done for the inspection and the dredging of the lagoon cells.
5. **Incident Command System (ICS100) training:** all Town staff have taken the day of training being split into two groups. The course was very informative and beneficial for staff. Management staff will be taking ICS200 & ICS300 training later in the year.
6. **Chronicle Building Demolition:** we will be taking samples to Edmonton for asbestos testing before demolition is to begin and for our records. We have a demolition permit and we will need to do first calls. Our PW will demolish the building unless the tests come back with asbestos, then we will need a contractor for demolition and disposal. We will be contracting truck(s) to haul to the landfill.

Please see attached CAO Action Tracker for council requests!
